(54) Title: SYSTEM AND METHOD FOR EXCHANGING TRANSACTION INFORMATION USING IMAGES

(57) Abstract: A system for communicating transaction information includes a plurality of client application devices and a plurality of transaction exchangers. A transaction processor is configured as a facsimile processor that is configured for processing a received facsimile image, by processing the received facsimile image to identify text data in the facsimile image, converting the identified text data to a standardized format, validating the identified text data in the standardized format, mapping the text data in the standardized format to data in a specified format; and providing the data in the specified format for further processing.
